PROFESSIONAL EXPERIENCE

June 2022-
Present

Maddlogic LLC
- Full Stack Developer
- Vue.JS, Laravel, Python, Docker, Postman, AWS S3, Twilio, Rest API
- Agile Scrum Methodology
- Provided web application engineering and maintenance for development cycle.
- Successfully upgraded legacy system to the latest version independently, enhancing performance, security and user experience.
- Reviewed code, debugged problems, and corrected issues.
- Developed unit test cases for testing and automation.
- Analyzed existing implementations to identify requiring improvements.
- Developed and maintained microservices architecture using Docker.
- Participated in requirements gathering to solidify prerequisites and determine the best technical solutions to meet clients' needs.
- Discussed project progress with customers, collected feedback on different stages and directly addressed concerns.
- Designed and developed forward-thinking systems that meet user needs and improve productivity.
- Translated technical concepts and information into terms parties could easily comprehend.
- Analyzed work to generate logic for new systems, procedures, and tests.
- Corrected, modified, upgraded, and stabilized software and frameworks to improve performance.
- Successfully implemented Amazon Web Services, harnessing its robust features and capabilities to enhance and optimize various aspects of infrastructure.

- I've had the privilege of directly engaging with clients, discussing potential improvements and the future for their digital projects. I find that my communication skills allow me to effectively convey technical details in a way that resonates with clients' needs.
- I've had the opportunity to provide live support, swiftly resolving issues on-site to ensure smooth project operations and client satisfaction.
- Experienced in working with Agile development processes and methodologies

Sep 2021-
Jan 2022

Jarvis Analytics Philippines, OPC
- Query Developer
- Designed and developed queries from complex database concept and structures.
- Optimized and analyzed queries to ensure delivered accurate and relevant results.
- Solidified understanding of database concepts, data modeling and syntaxes and capabilities to tune up and enhance speed and efficiency.
- Ensures smooth function of software solutions.
